

AMENDMENTS TO THE CLAIMS

1-9. (Cancelled).

10. (Currently Amended) A method implemented by a computer comprising a processor and a memory, the processor configured to implement instructions stored in the memory for analyzing a print job comprising a plurality of graphics objects, ~~each object comprising any of pages, text, images, and graphics~~, each graphic object having at least one associated color-space definition print attribute, the method comprising:

configuring at least one user computer in a printing environment, wherein said computer includes an audio output;

determining, by a computer, a color-space schema ~~at least one print~~ attribute of interest;

associating, by the computer, a corresponding auditory sound ~~unique~~ marker with each a color-space schema ~~determined~~ attribute;

receiving, by the computer, PostScript ~~page description language (PDL)~~ commands that describe the graphics objects included in the print job;

interpreting, by the computer, the PostScript ~~PDL~~ commands to process each graphic object in the print job and the at least one associated color-space definition ~~print~~ attribute;

reporting, by the computer, a color-space schema not present in said printing environment any global printer settings and printer factors that affect the print job, wherein the color space schema comprises a device-dependent color space schema;

determining, by the computer, if said graphic's color-space definition matches said color-space schema not present in said printing environment any of the at least one associated print attribute matches any determined attribute; and

reporting, by the computer, the results of any graphic object with an associated color-space definition print attribute that matches any color-space schema not present in said printing environment—determined attribute using the corresponding unique marker, by transmitting said auditory sound via said audio output

wherein reporting comprises any of printing a report and transmitting data for display on the computer.

11-23. (Cancelled).

24. (Currently Amended) The method of claim 10 [[23]], wherein the graphic's color-space definition value comprises a red, green, blue color value.

25. (Currently Amended) The method of claim 10 [[23]], wherein the graphic's color-space definition value comprises a cyan, magenta, yellow color value.

26. (Currently Amended) The method of claim 10 ~~[[23]]~~, wherein the graphic's color-space definition value comprises a spot color value.

27-33. (Cancelled).
